State Engineer, State Capital,  
Salt Lake City, Utah.

Re: Bowl Creek distribution

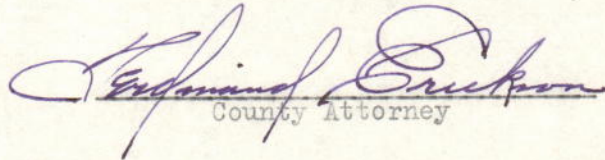

Dear Sir:

Your letter of April 14th addressed to Mr. Columbus R. Hall, Hanksville, Utah, has been handed to me with the request that I reply thereto.

I am aware that there is some bitterness between the Hall family and Mr. Vern Pace, another user on this stream. I have not discussed the appointment of a commissioner with Mr. Pace but I am confident that the appointment of F. J. Weber will be most distasteful to the Hall family. If, perchance Mr. and Mrs. Hall were to withdraw their request for the appointment of a commissioner, would it not be possible for Mr. McBride to go to Bowl Creek and supervise the installation of a proper measuring device and see that the waters in the creek are properly distributed. If such can be done I am authorized by Mr. and Mrs. Hall to withdraw their request for the appointment of a water commissioner at this time.

May I, therefore, please urge that no appointment be made until it is first determined whether or not Mr. McBride can make the division and supervise the installation of the measuring device.

Very truly yours,

  
County Attorney
